MIDTERM LABORATORY EXAMINATION CCS114 – WEB TECHNOLOGIES

NAME: Peter Angelo G. Flores SCORE: _____
STUDENT NUMBER: 2202556 SECTION: 2IT-A
NAME OF PROFESSOR: Prof. Albert Q. Alforja
GITHUB REPO LINK: https://github.com/florespg56-ux/midtermiabexam_CCS114.git

GITHUB LINK: https://florespg56-ux.github.io/midtermiabexam_CCS114/

Objectives

By the end of this laboratory examination, students should be able to:

1. Apply HTML5 and CSS3 fundamentals to structure and style a personal portfolio website.
2. Utilize at least ten (10) different Bootstrap components to build a functional and visually consistent website.
3. Design and implement a multi-section portfolio (Homepage, About Me/Us, Gallery, Mission/Vision, and Contact Me/Us) using Bootstrap's navbar and grid system.
4. Ensure the website's design is responsive across different screen sizes.
5. Maintain a professional, consistent, and visually appealing web design.

Instructions

You are required to create a personal portfolio website using HTML5, CSS3, and Bootstrap. Your portfolio should include the following elements:

- Use at least ten (10) different kinds of Bootstrap components (e.g., Card, Jumbotron, Carousel, Button, Alert, Navbar, Modal, Badge, Accordion, Progress Bar).
- Create a Navbar with the following sections and behaviors:
 - Homepage: Create a design for your own homepage.
 - About Me/Us: Information about yourself (e.g., name, age, educational background, skills, etc.).
 - Gallery: Create a design with six (6) images of you.
 - Mission/Vision: Display the Mission and Vision of University of Cabuyao (PNC).
 - Contact Me/Us: Create a design showing how a client can contact you, using a text field and other relevant form elements.
- Ensure that the portfolio/web pages you design are responsive.
- Maintain a professional and visually appealing design with a consistent layout, font choices, and color scheme.

Examination Guidelines

- This is an individual examination. Copying or sharing of code with classmates is strictly prohibited and will be marked as academic dishonesty.
- You may refer to official documentation (Bootstrap docs, MDN, W3Schools) only. Do not use AI code generators or copy solutions from online sources.
- Manage your time well and save your work frequently to avoid losing progress.
- Raise your hand or message your instructor immediately if you encounter technical issues during the exam.
- Submit your work before time is called; late or incomplete submissions may be scored accordingly.

Deliverables & Submission Guidelines

- Complete project folder (HTML, CSS, JS, and image assets) compressed as a single .zip file, OR a link to your GitHub repository
- Screenshots of all five sections (Homepage, About Me/Us, Gallery, Mission/Vision, Contact Me/Us) showing the completed design
- This Laboratory Examination form, fully filled out

File naming format: LastName_CCS114_LabExam (e.g., DelaCruz_CCS114_LabExam).

Peter Angelo G. Flores

Hello! I am a third year BSIT student. I like playingand sleeping but I also love to study. Im fast learner and fast to forget. My favourite thing to do is to not give a worry about such things except money.

I enjoy creating responsive websites, learning new programming languages, and working on projects that challenge my creativity and make me crazy thinking about it.

Age: 44

School: PnC

Course: BSIT

Hobby: Playing & Studying & Sleeping & Reading

I like drinking beer.

Rubric for Laboratory Examination

Assessment Ratings	Need Improvements (1)	Fair (2)	Good (3)	Excellent (4)
Program Completion <i>(20 pts)</i>	The website produces incorrect results or key sections are missing.	The website produces correct results but does not display them correctly.	The website produces correct results and meets most other specifications.	The website meets all the specifications.
Program Readability <i>(10 pts)</i>	The code is poorly organized and very difficult to read.	The source code is readable only by someone who already knows what it is supposed to do.	The source code is easy to read.	The source code is well organized and easy to follow.
Bootstrap Component Implementation <i>(30 pts)</i>	Fewer than half of the required Bootstrap components are used, or navbar sections are missing or non-functional.	At least half of the required components and navbar sections are present but with several implementation errors.	Most of the 10 required Bootstrap components and all navbar sections are implemented with minor errors.	All 10 required Bootstrap components are correctly implemented and all navbar sections function as specified.
Design & Responsiveness <i>(40 pts)</i>	Background, text format, and color usage are randomly chosen. Pages seem unrelated, and the layout does not adjust to different screen sizes.	Background, text format, and color usage are randomly chosen with few consistent elements throughout. The layout shows minimal or inconsistent responsiveness across screen sizes.	Background, text format, and color usage are somewhat consistent with little inappropriate variation. The layout is mostly responsive, with minor issues on some screen sizes.	Background, text format, and color usage are carefully chosen to produce a consistent screen layout for all pages. The design is fully responsive and adapts seamlessly across all screen sizes.
